R&D Capability

3S LIFT has advanced R&D centers in Beijing, Dallas, and Hamburg, as well as a postdoctoral station in Beijing.

There are more than 300 R&D and technical staff in our company, which makes us a leading enterprise in the industry.

We have developed a three-tier testing system, from labs to factories and then to wind farms. Our products first go through simulation tests, then go through testing for key parts, and finally go through closed-loop shaping experiments to check the functions and performance under prototype tests, on-site complete machine function and performance tests, and actual wind farm tests.
